

**NEXT LEVEL SECURITY SYSTEMS UNVEILS
NEW UNIFIED SECURITY MANAGEMENT SOLUTIONS AT ISC WEST**
Company highlights the NLSS Gateway 2.3 and specialized NextDetect application

Las Vegas – March 19, 2012 – [Next Level Security Systems](#), a provider of a new breed of unified, networked security solutions, will highlight the next evolution of its open platform, IP-based security technologies at ISC West 2012, being held March 28-30, 2012 at the Sands Convention Center. At Booth #24107, conference attendees will receive a first glimpse of the NLSS Gateway 2.3, a unified security management system that combines IP access control, IP-based video management, video analytics and more into a single, easy-to-use networked platform, and Next Level Remote Management Services (RMS) 2.3. The company’s flagship technology now offers a host of additional features and systems upgrades.

“With our 2.3 upgrades, we have added capabilities that will enable users to quickly gather critical security data and customize the way it is received,” said Peter Jankowski, Chairman and CEO, Next Level Security Systems. “The mission of our IP solutions is to deliver information quickly and efficiently to enhance safety, and we have upgraded our systems and services to enable customers to view the entire scope of their security infrastructure on one interface.”

With the NLSS Gateway 2.3, users can group devices, users, cardholders and other assets, such as floor plans or building layouts, for a customized management tool. The grouping functionality enables users to combine sites and IP devices to construct a layered map or floor plan. Users can also set customized roles and permissions for different users to control system access levels.

Conference events

ISC West attendees are invited to view demonstrations of Next Level’s technologies and meet the executive team during the company’s annual opening day cocktail reception from 3 p.m. to 5 p.m., Wednesday, March 28 at the Next Level booth, #24107.

Next Level will be participating in a set of educational panel discussions over the course of the conference. “Business Continuity as a Key Component of the Security Equation” featuring Next Level’s Vice President of Access Control, Bill Jacobs, will be held from 8:30 a.m. to 10:00 a.m. Tuesday, March 27. “Mythbusters: Cutting Through the

Confusion of the Cloud,” is being hosted on Thursday, March 29 from 10:15 a.m. to 11:15 a.m., and features Jumbi Edulbehram, Vice President of Business Development, Next Level Security Systems.

Technology Partnerships

Next Level’s open platforms enable integration with industry-leading technology companies. Attendees can view integrated demonstrations between Next Level and Sony Security at booth #22025, and with HID Global at the ScanSource booth #25075.

“Working closely with innovators like Next Level complements Sony’s security portfolio and further helps us deliver solutions that exceed expectations for our customers,” said Mark Collett, General Manager, Sony Security Systems Division. “It is our mission to help users leverage new technologies to enhance security and build business efficiencies. Aligning ourselves with emerging leaders such as Next Level allows us to meet this goal.”

“Next Level’s unified security management platforms enable resellers to add more innovative solutions to their product offerings and deliver enhanced security to their end-user customers,” said Tony Sorrentino, President, ScanSource Security. “We look forward to showcasing Next Level’s technologies at ISC West to further build awareness on the opportunities available with their IP solutions.”

Throughout the conference, Next Level will demonstrate its advanced IP-based security devices alongside products from industry partners including Arecont Vision, ASSA ABLOY, Axis Communications, Bosch Security Systems, EMC, HID Global, Hikvision, IQinVision, Mercury Security, Panasonic, Pelco and Vivotek.

About Next Level Security Systems

Next Level Security Systems is a physical security company delivering a new breed of unified networked security technologies. The NLSS Gateway, Next Level’s flagship product, is an award-winning, IP-based security management platform that integrates video management, access control, video analytics and remote management into a single appliance. It is successfully used in the retail, commercial, education, transportation and government markets. All of Next Level’s products, sold through distribution worldwide, combine the performance, sophistication and functionality of enterprise-class security systems into a compact, unified and affordable solution.
