

PRESS RELEASE

**NEXT LEVEL SECURITY SYSTEMS' CLOUD SERVICES
DELIVERS COMPREHENSIVE SECURITY FROM ANY LOCATION**

*Powered by patented-pending technology, NLSS Cloud Services offers
more than other hosted service model in the security industry*

Philadelphia – Sept. 10, 2012 – Next Level Security Systems, a provider of a new breed of unified, networked security solutions, today announced the availability of NLSS Cloud Services, which offers users remote access and multi-site security management from anywhere in the world.

NLSS Cloud Services are available for use with the entire suite of NLSS Gateway technologies. Powered by NextConnect™, a patent-pending peer-to-peer technology that efficiently streams live video to an unlimited number of users from a single site, NLSS Cloud Services delivers access to the NLSS Gateway's features through any Web browser or mobile device. Users can access camera settings, live surveillance video and door controls, and even view video streams from up to four different sites simultaneously on a single screen. In addition, software can be updated remotely, eliminating the need for on-site support.

“NLSS Cloud Services provides our customers with peace of mind that their security systems are operating and updated from anywhere in the world,” said Peter Jankowski, Chairman and CEO, Next Level Security Systems. “Our managed services used in conjunction with the NLSS Gateway truly delivers a comprehensive view of an entire security infrastructure to simplify system administration and management.”

NLSS Cloud Services improves upon traditional models of hosted video and access control by eliminating the need to route video and other data through a host computer for each update. NextConnect establishes a direct connection between the remote user and the NLSS Gateway, allowing video to stream faster and smoother with reduced bandwidth consumption. In addition, video quality is not degraded as more users log in to view the same video stream.

To learn more about NLSS Cloud Services powered by NextConnect, visit booth #1255 at ASIS, being held Sept. 10-13 at the Pennsylvania Convention Center in Philadelphia. Next Level invites all conference attendees to its annual opening day cocktail reception from 2:30 p.m. to 4:30 p.m., Monday, Sept. 10 in the NLSS booth. Conference attendees can also enter a drawing to win a Sony HD Camera and an NLSS Gateway Micro.

About Next Level Security Systems

Next Level Security Systems is a physical security company delivering a new breed of unified networked security technologies. The NLSS Gateway, Next Level's flagship product, is an award-winning, IP-based security management platform that integrates video management, IP access control, video analytics and remote management into a single appliance. It is successfully used in the retail, commercial, education, transportation and government markets. All of Next Level's products, sold through distribution worldwide, combine the performance, sophistication and functionality of enterprise-class security systems into a compact, unified and affordable solution.
